Introduction

“ASA Astrosysteme GmbH oversees every aspect of our astronomical product development including design, fabrication, manufacturing, and testing. The result? Every system – regardless of size – has unsurpassed reliability, world-class quality and an unbeatable price-to-performance ratio. All of our products are made in Austria. Our systems are used in a wide range of astronomical pursuits including research, SSA, Space Debris Detection & Tracking and Astro-Photography. Our passion is the pursuit of perfection – brought to life by the ASA team of experts.”

Egon Döberl, CEO ASA Astrosysteme GmbH

ASA factory

- Headquarter
Neumarkt, Galgenau 19

- ASA Optic shop
Waldburg, St. Peter 95
